Blackthorn Technologies is an agile software developer and digital forensics company. We have been supporting our customers since 1996 with innovative business solutions that have enabled them to manage and control important information that is at the centre of their business. We pride ourselves in developing strong relationships with our customers and helping them achieve their strategic goals. Blackthorn invests in a talented team who help to drive our organisation and enable us to continue to innovate. Blackthorn helps our customers to manage, interrogate and analyse their data so they can make better business decisions. We can help you keep pace with change that allows you to find new ways to do business.
